HNET TOKEN WHITEPAPER · V1.1 · OCTOBER 2026

HNET, the token of the HidraNet privacy network

HNET runs on Solana. It funds the network, settles trades between `.hidra` shops and their buyers, and will pay for HidraVPN without linking a payment to a connection. This paper gives the facts a buyer needs, each one checkable on chain.

Network Solana **Mint** Aov3…pump **Launched** 8 October 2026

Companion Technical whitepaper v2.0

Solana Token-2022, no transfer fee	**957M** supply today, after burns; it can only shrink	**0** new HNET can ever be minted
0 presale or private round	**2.1%** held by the team, locked on Streamflow until 2028	**Free** the network stays free to use

SUMMARY

In one paragraph

HidraNet is an open-source privacy network: a browser, encrypted applications, its own `.hidra` services and HidraVPN, all under the MIT licence. HNET is its token on Solana. It launched with 1,000,000,000 and no presale; burns have taken the supply to 957,402,743, and no one can ever add to it. HNET pays for things that cost money to run: servers and bandwidth today, HidraVPN access and the other paid HidraNet services as they arrive. It also lets people buy and sell on `.hidra`. Privacy itself is never paywalled: the network, the browser and the apps stay free.

Each use of HNET below carries a label: LIVE works today, PLANNED is on the roadmap, and planned is not a promise of a date.

1

Token facts

Every line below can be checked on chain. Open the mint on a block explorer and compare.

```
Aov3BtQvrGXM5V9oiHu8PKJWeV8a2rFnr24fwWcNpump
```

ITEM	VALUE
Name and ticker	HidraNet (HNET)
Network	Solana mainnet
Standard	SPL Token-2022 (the Token Extensions program); no transfer fee, no transfer hook, no permanent delegate
Mint address	`Aov3BtQvrGXM5V9oiHu8PKJWeV8a2rFnr24fwWcNpump`
Supply at launch	1,000,000,000 HNET
Supply today	957,402,743 HNET, after burns (October 2026)
Total burned	42,597,257 HNET (launch supply minus today's); every burn is a public transaction in the mint's history
Decimals	6
Mint authority	None: no one can create more HNET, so the supply can only go down
Freeze authority	None: no one can freeze a holder's balance

ITEM	VALUE
Launch	8 October 2026, an open launch on pump.fun; no presale, no private round
Team allocation	20,548,400 HNET (about 2.1% of today's supply), locked until 2028
Team lock	A Streamflow lock contract; anyone can check its amount and release date by looking up the mint on Streamflow
Liquidity	A PumpSwap pool; HNET graduated from the pump.fun bonding curve
Support wallet	`ExYv4idyqxmuodpoZtxyGxeTGi6oYrqFAshAgCsRissc` A single-signature wallet, not a multisig. Every transfer in and out is public on chain.

⚠ **The mint is not a wallet.** The mint address ends in `pump` and is the token itself: never send anything to it. To support the network, send HNET to the support wallet.

2

What HNET is for

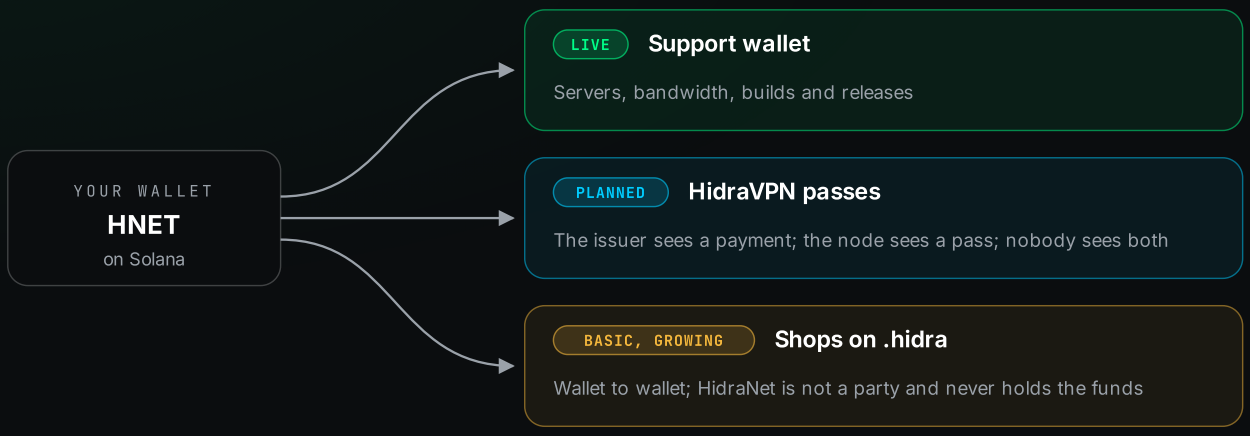

Figure 1. Every use of HNET pays for work or for a service. None of them pays a holder for holding.

Fund the network LIVE

HNET sent to the support wallet pays for servers, bandwidth and releases. An independent security audit is the next planned use; the auditor will be named when hired. Every transfer is public on chain.

Buy and sell on .hidra LIVE, BASIC

Shops published as `.hidra` sites take HNET straight into the seller's wallet, and HidraReview lists them under Marketplace. An integrated marketplace, with signed listings and encrypted orders, is planned.

Pay for HidraVPN and HidraNet services

PLANNED

HidraVPN access first, then the other paid HidraNet services, paid in HNET. VPN access uses passes built on blind signatures: the issuer sees a payment and the VPN node sees a pass, and nothing links the two. Before this goes live we will publish who runs the issuer and how nodes stop a pass being spent twice. Free access stays.

Bounties and HidraNet Pro PLANNED

Rewards in HNET for reported security flaws, and paid extras that cost money to run (more HidraMail storage, more `.hidra` sites), payable in HNET.

```

3

Roadmap

STEP	STATE
HNET launched on Solana; mint and support wallet public	DONE
Team allocation locked on Streamflow until 2028	DONE
Support page in HidraBrowser, with HNET preselected	DONE
Shops on `.hidra` taking HNET; Marketplace in HidraReview	DONE, BASIC
Security bounties paid in HNET	NEXT
Independent security audit	PLANNED
HidraVPN access paid in HNET, through unlinkable passes	PLANNED

STEP	STATE
Integrated marketplace on `.hidra`	PLANNED
Other paid HidraNet services, payable in HNET	PLANNED
HidraNet Pro, payable in HNET	PLANNED
Team allocation unlocks	2028

4

What HNET is not

- **Not a share.** It gives no claim on HidraNet, its assets, its revenue or its profit.
- **Not a source of income.** No staking rewards, interest, dividends or revenue share.
- **Not a price promise.** No buyback, no burn schedule, no price support.
- **Not a gate.** The network, HidraBrowser and the apps never require HNET.
- **Not a vote.** The code is MIT-licensed; anyone may run it, audit it and fork it.

5

Buying safely

Check the mint, not the name. Anyone can create a token called HNET. The real one is `Aov3BtQvrGXM5V9oiHu8PKJWeV8a2rFnr24fwWcNpump`; compare it character by character.

Never share a seed phrase or a private key. HidraNet never asks for one, anywhere.

We never write first. No one from HidraNet starts a private conversation to offer help, an airdrop or a sale.

Official sources: this site, the repository at github.com/NeurexBK/HidraNet and x.com/HidraNetoff.

6

Risks

RISK	WHAT IT MEANS
Price	HNET can lose all its value. Its price can move sharply in either direction.
Liquidity	There may be no buyer at the price you want; the PumpSwap pool can be thin.
Delivery	Planned uses may arrive late, change, or not arrive.
Team unlock	The team's 20,548,400 HNET become free to move in 2028.
Support wallet	A single-signature wallet, not a multisig: it depends on one key, held by the team.
Regulation	Rules for crypto-assets differ by country and are changing; they may limit how HNET can be offered or used.
Technology	Solana, wallets and exchanges can fail or have bugs.
Privacy	HNET transfers are public and permanent on Solana.
Timing	Even with blind passes, paying and using a pass straight away can let the two be linked by time. Buying passes ahead reduces this.
Keys	A lost or stolen private key means lost HNET. No one can reverse a transfer.
Tax	How HNET is taxed depends on your country, and can change.

7

Legal notice

This paper is for information only. It is not an offer to sell, or a solicitation of an offer to buy, any token or other asset; it is not a prospectus, and it has not been reviewed or approved by any regulator. Nothing here is investment, legal, tax or financial advice. HNET gives no right to profit, interest, dividends, equity or repayment. Planned features describe present intentions, which can change. Check the law where you live before you buy, hold or use HNET.
